Mcafee Virusscan Enterprise 8.9i --

Like it was pointed out in the video, McAfee says that Windows 8 is not compatible with the Enterprise product. McAfee does not specifically say "Windows 8.1 is not compatible". Are these computer they are talking about from the video Windows 8 or Windows 8.1? You can view the video here. I tried to install McAfee VirusScan Enterprise 8.8i on a computer with Windows 8.1 Pro. After I installed, I noticed that it would not run. The McAfee installation program would pop up briefly, then close. I tried installing McAfee VirusScan Enterprise 8.9i. After I installed it, it ran but I could not access McAfee. I chose the option to create an account and it gave me error message, "The McAfee Service Can't Be Started. Fix the problem, or contact your system administrator". So I contacted McAfee. I am trying to reach the Customer Service by phone now. McAfee VirusScan Enterprise 8.8i is not compatible with Windows 8. Windows 8/8.1 is the right answer. I have this very limited option - McAfee Enterprise 8.9i - for my home PC, but not for my work PC at work where it has McAfee Premium which is the Enterprise, etc. I went back to the McAfee website and got info that McAfee Enterprise 8.9i was not supported for Home use. I reinstalled McAfee Premium on work PC - now it is recognizing the McAfee Enterprise 8.9i product. So now the question is - if I wanted to use the McAfee Enterprise product, can I remove the McAfee Premium product? Any comments or suggestions? A: Your home computer likely has the McAfee Home edition. The Mac version of this product is known as McAfee AntiVirus Plus (Symantec used to refer to this product as McAfee AntiVirus). This product is more similar to the McAfee AntiVirus Premium product than the Enterprise product, as it isn't a real-time application like the Enterprise product. McAfee also sells an Android and iOS (iPhone) application which is nothing more than a front-end user interface to the Enterprise product. If the McAfee product is installed properly, you should be able to just run McAfee and have the Enterprise product begin scanning. When it has completed its work, you will be informed that it has finished running so that you can safely remove the application 3e33713323
