Automatically backup your photos, videos, call history and everything else you may have on your phone. A few years ago, when phones were much bigger and bulky, you may well have needed an extra case to keep your phone safe. This was simply because the phone's body and cover could get scratched off easily. Well, this scenario could be completely different now, as phones have become slimmer and smaller, and the manufacturer has also included the battery and other vital components of the phone in the body. The only things that are left on the cover is a screen protector and the camera lens. Nowadays, as phones are becoming smaller, and consumers have become more conscientious about the environment, manufacturers have made their phones water, dust and shock proof, in fact they are completely waterproof. This however, will not save the phone, if your phone gets damaged somewhere, it'll still be useless. So, what do you do in such cases? Well, you can buy a new phone, but this can be an issue if you're an avid user of social media, or a content provider such as photographers, and you have to charge your phone every single day. So, what do you do in such cases? Here's where our friends from Battery Buddy come in. Battery Buddy for Android is one of the best battery saver apps, and you should definitely download it. Whether you are an avid social media user or a content provider, you can at least make sure that your phone is always charged to ensure you won't lose any of your essential data. So, what can this amazing app do? Battery Buddy for Android is a battery saver app, and if you are a user of Android phones, you should definitely download the app. The app has been developed by this duo, and they have done a great

Take back control! Loads of features that make your life a bit easier, with no complicated dialogs to be afraid of. The app doesn't stop there, as it can help you fix issues with the phone as well! How to Transfer Featured Posts Looking to get the best number of followers on Instagram? Then you have come to the right place. Today we are sharing how to get more followers on Instagram without spending a dime. However there is a catch! The trick [...]Q: How to I assign several variables to NULL using If construct in ANSI C? I am trying to assign several variables to NULL. I am trying to use an if statement to do so, but my syntax is not correct. My objective is to set the "v1" variable to NULL. int *v1, *v2; int main(void) { if(v1 = NULL){ v1 = malloc(sizeof(int)); v1 = v2 = NULL; printf("%d ",*v1); } else printf("%d ",v1); return 0; } A: You are assigning NULL to v1 and then not doing anything with it. Your assignment to v1 is irrelevant. Your code should be: int *v1; ... if(v1 = NULL){ v1 = malloc(sizeof(int); } printf("%d ",*v1); This movie is a great escape that should have played all summer long... I hope! The cast is awesome, with two of the hottest couples on screen (Remy and Matt are in this, check them out!). I think the movie is a little short, and it could have been so much more.I gave the film a 6... I think it is really good, even if it is only a couple hours. Check it out... Monday, October 16, 2006 X-Men and Star Wars Watching both X-Men and the recent Episode III has given me an awesome feelin' in my heart about what could be. I love my team of X-Men, and I have a huge amount of respect for what both the X-
