Q: how to edit class properties in extjs4 I am stuck for changing properties in a class i have made.The class contains inherited from Ext.base. I don't know how to change properties. Here is a sample. Test.js Ext.define('App.test', { extend: 'App.wrapper', alias: 'widget.test' }); App.test: Ext.define('App.test', { extend: 'Ext.form.Panel', alias: 'widget.test', initComponent: function() { this.monTextField = new Ext.form.TextField({ id:'monTextField', fieldLabel: "Mons", hideLabel: true, listeners: { blur: function() { if (this.value) { alert(this.value); } } } }); } }); A: If you want to change properties of an inherited class, just add an empty function to App.test. It's the same as if you would have added an new method to App.test but it will only be called if you call the inherited method. class App.test { //... your original code newMethod() { console.log("newMethod"); } } If you want to override properties of the inheritor, you will have to create a new class. If you want to change the properties of
