I always knew that the road to moral progress was a rocky one. The evidence, thankfully, suggests that I was right. As many commentators have pointed out, morality is what you make it: If you take all human values seriously, then there's no specific moral law that will please everyone. But that is a measure of the moral failure of the legal-political system we have erected, rather than a reason to get up and walk away. A parody of a hypothetical set of moral principles — one widely thought to be offensive or unfair, for example, or not in alignment with gender or race — is not an objection to the evidence, but rather a recognition that what is morality is fundamentally up to us. A society won't change unless there are people whose incentives push them to do so. It is the essential problem of progress: A progressive change is more likely to be adopted by a people (or a government or society at large) than a reaction. From the Dark Ages to the Gilded Age, many of the states that were morally serious were the ones that had the most productive economies. The horse-and-buggy economy of the seventeenth century Massachusetts — the Puritan charter state, whose motto was “Junius quam Britanniarum” (◆ 595f342e71
