Space Giraffe is an abstract action arcade style game that takes place in a succession of beautiful environments generated by an advanced graphics synthesizer. It presents itself as a shooter but the more you play the more you discover the hidden depths and strategies that make the gameplay satisfyingly rich and rewarding. This is the boldest evolution of the trance-shooter, created by the company that helped to define the genre with the groundbreaking [Tempest 2000]. 200 levels of transcetastic action. Beautiful abstract graphics that respond to audio input. Deep gameplay that rewards strategic and thoughtful play. Accessible enough to entertain a novice player, but deep enough to satisfy the arcade expert. Intense, satisfying, synaesthesiac shooting action that you'll return to again and again in search of ever higher scores. Space Giraffe, developed by Fabian Briel, is a 3D cross-platform game that was released in 2003 and supports Windows, Linux and Mac OS. Space Giraffe was designed to show off the capabilities of the now defunct Baan Banshee 3D software environment, and demonstrates the possibilities of using that engine's unique advanced shader technology to create hypnotic and innovative visual effects. The game was inspired by both the fiction and history of outer space, in particular the works of Isaac Asimov and Philip K. Dick, plus the music of Philip Glass. Video walkthrough on Vimeo by Guillaume Coulette. The project was also presented at the International Space Development Conference in November 2002.
