In this story you will meet, help and love up to four characters. In this short but sweet visual novel you will be faced with a choice that will play an important role in your life, and in the life of your loved ones. Their choices will depend on your own decisions, your own path you choose to follow. If you choose to help everyone and to save the girl with the beautiful brown hair, things will be

fine for you. But if you decide to follow your own wishes and to gain what you want, everything could go wrong... The game is updated regularly. Enjoy!

Q: Show that if w is a real number greater than or equal to 1 , then the sequence w, w^2, w^3, \dots is increasing. Show that if w is a real number greater than or equal to 1 , then the sequence w, w^2, w^3, \dots is increasing. This seems intuitively true, however it isn't really clear to me how to prove this. Any ideas, or anyone care to explain this?

A: $w^2 = w^2 \geq w$ so $w^2 \geq w^2 + w$

Therefore, as w^2 and $w^2 + w$ are both positive, $w^2 \geq w^2 + w \geq w$. Since $w \geq w^2 \geq w$, A: An easy proof: \$\$\$1 FILED

Everything you'd wish for in a tower defense strategy game... you play the defenses, you play the troops, you place them how you think is the best for the defense of your own base, of your neighbors and of the world. There are so many different things to do or to improve with a Tower Defense game that you can

really spend your time for a long time in this beautiful and challenging game. There are heaps of fun and satisfying things to do like research new towers, improving units or buildings. The game also includes many different enemies to protect the bases and troops, such as tanks, aircrafts and huge monsters. "Magic Siege - Defender" is an interesting strategy game with a bit of a puzzle aspect to it. I recommend it.5/5 Graal The game starts off with you going in to battle with the biggest creature to ever roam the planet, the Gigan Stego. When you defeat the Gigan, you find out that there is another life form on the planet,

and it is a race of entity called the San Hui so you have to defend the planet from that threat. Along with this is the same concept of collecting energy to build up your fighter, money to buy upgrades and locations to build your towers. The towers can be upgraded to form different formations and your fighter can be upgraded to become more powerful. You will also need to upgrade some attack spells that can be added to your fighter to gain even more power. Then you have your main base that you can use to produce fighters and upgrade spells to attack enemies. There are few more things you can do with the base

such as upgrading the research building. You will be matched to other players that are in the same map that you are, so you can team up and work together to take down the enemy base. The points of your towers will be shown during battle and the more hits you take, the weaker the tower will be. The graphics are really good considering it is a mobile game. There are still some details that could be polished up and could be a bit brighter to add to the impressive detail. But overall the game looks great and looks a bit like the official game, "Defender of the Crown".4/5 Graal Game "Magic Siege - Defender" Gameplay: "Magic Siege -

Defender" is a great tower defense mobile game that is a very addictive little game. The game features quite a bit to keep you busy for quite a

A signal is amplified by amplifiers having transmission rate of 12.5 GHz and lies between 4 and 5GHz. Timing error of the signal sent exceeds $\frac{1}{4}$ symbol time. How many days of time does a cable take to send the signal? This must have been a question in entrance exam. I tried to solve it on my own first! But can't understand the concept clearly. A: At a distance of 3000 km a day for a one way trip will take 4000 days, if the signal passes back to earth it will take 4000 days. And 7000 days from earth to the moon. So, on the order of about 6000

March of the Elves is an award-winning game from Mythic Portal based on the epic story of the Elf Queen's invasion of the mortal realm - A fairy tale epic that inspired the greatest generation of fantasy role-playing games! The first module of the best-selling series - Dark Elf Rage - features two epically themed adventures for players and characters alike. The module offers four short adventures for players to become renowned Heroes, including an encounter in the City of Sin - the City of Fallen Angels. The elf adventure begins with the arrival of

a harpy and an elf princess who seeks retribution for the death of her parents, who died in the hands of a man the elves consider a traitor to their nation. To elvishly correct the situation, the elves call upon heroes to venture into the City of Fallen Angels. (PC and NPC Tokens for use in any fantasy setting or system from Mythic Portal) My Thoughts: I love the inclusion of the "Fallen Angels" expansion. It's great! A trip to the City of Sin, plus a small portion of the City of Angels. The building is a bit different, and the race of the rats is fun. I didn't

love the enemies though, only because it seemed like they had a hard time damaging the players. It was a bit too powerful, but it still fit with the game. March of the Elves (1.4.7) [Official Site], is a free to play, open world role-playing game about Elves invading the world of Men. The elves are led by the powerful Elf Queen, who has been stranded in the mortal world, after being imprisoned for centuries. She and her servants now plan to return home and reclaim their rightful place in the world. However, while wandering into the city of sin, they

encounter monsters and mischief as well as a renewed awakening of the city's original inhabitants - the mischievous rats.
