special skills, and improve the effects of skills that are improved by weapon skills. This effect will not occur if there is no marking. A wide variety of weapons, such as swords and axes, can have the "branding" function. Now, when you change your weapons or armor with the "branding" function, it will be called "Brandish", and has a slightly different icon. When the "branding" function of weapons and armor is combined with weapons and armor that provide the effects when wielded in conjunction with weapon skills, effects that are improved by weapon skills will greatly increase. This effect occurs for both "branding" weapons and armor and weapons with the "branding" feature that are wielded in conjunction with weapon skills. "Brandish" skills that deal damage that is increased by the effects that weapons and armor have when they are wielded with weapon skills. Gain the effects of multiple skills at the same time. Since you can equip an infinite amount of weapons and armor with the "branding" function, you can enjoy the

## **Elden Ring Features Key:**

**Multiplayer Online:** If you have any questions about this game, please contact us through the support form on our website. ( /> Set up a VPN on your client for an even smoother online experience.

Note: During testing we had a technical issue and needed to disconnect some VPN users from the League, so we apologize for the inconvenience.

**Customizable Control:** Whether you choose to use a controller or a mouse, Xbox One S, Xbox One X, PlayStation 4, or PlayStation 4 Pro, you can simply perform movements and interactions on the screen simply by pressing or pushing a button, changing the XY axis, and rotating the TV. (Not sure how that works yet.)

**Dynamic Skill Costs:** When we develop an exciting action scenario, we must first consider whether the skill is interactive. For example, if you fight enemies while attacking, the skill cost increases. Similarly, playing a rich and rewarding action story requires a strong understanding of the game (3m 28s). We adjust the difficulty according to your speed of leveling your character.
