"A big part of what 'HyperMotion' can achieve is simulating the many small moments of a complete match," EA Sports GM Andrew Wilson says. "We are allowing the artificial intelligence on the opponent to go into these micro moments and decide. With this technology, we can decide which run is best, and who should be winning the ball back or intercepting it. We can also think about where we should position our midfielders in order to exploit a gap in an opponent's line, or to force a defender to commit. The speed and intensity of the match translates into these micro moments where the opponent's AI can overthink and react. 'HyperMotion' enables us to make these micro decisions in our gameplay that would have been impossible without this new technology." In addition to the various "on-the-ball" enhancements, EA Sports also created a new "Off-the-ball" AI - this AI is a vast improvement over previous versions. New system of play-actions, switches, and off-ball manipulation are employed by both the offense and defense. Players are able to utilize positioning and tactical awareness to make key decisions, and can execute and re-frame a football match. Character Models and Animation In the years since FIFA has debuted, the inclusion of real-world athletes and stadiums has never fallen short of the end goal, but this year it's no simple task to get everybody in line. Namely, for FIFA 22 EA Sports has pushed the boundaries of its technology by making its existing characters more lifelike than ever. The game's players have been re-engineered and now have more muscle mass, weight distribution, and realistic muscle fiber direction. Playing a match with a real player, whether it's Ronaldo or Neymar, will feel like a whole new experience. Add to this the excitement of stadiums and player movements, and you have yourself one of the most advanced viewing experiences in the sports gaming genre. The attention paid to the footballing experience extends to the players themselves, as EA Sports has also integrated player-based AI this year, with each player having a set of in-depth player traits. From that robust AI core, the players will also react to certain actions and thereby show off their unique habits and abilities. The game's play has also been powered by an all-new animation engine, which allows players to break into highly refined, overhead pass animations

Fifa 22 Features Key:

- Re-designed Career Mode Live out your dreams as both a manager and a player in FIFA 22.

Create the newest club in FIFA, design your kits, style your stadium, and choose whether to compete with the elite or rise up from the lower divisions as you manage your club to glory. Or test your skills as a player, with a more immersive Player Career mode that gives you more ways to progress, achieve, and immerse yourself in your Pro's journey through the game.

- **RealPlayer Motion Technology** to control the game in your own on-pitch movements. You can control defenders by turning and tucking, drop back to receive, and run into attacking spaces. Use the ball to turn, dribble and beat your opponents. Attack and receive aerially. Spin the ball past the last defender to score. Move to wherever it is you need to be in the final third to find the space and time to score with a move.
- **MA2 Speed, Stamina, and Press and Control** that have never before and tackles require just one button, not two. Even more ball physics and Dynamic Player Trajectories mean you can control the ball in all sorts of different ways. Build up your playmaking skills using new assists and re-designed Player Trajectories (dribbling, spinning, curve shots and more). A more flexible shooting system allows you to shape your shots, with more accuracy and more shots ending in the back of the net. Players with Vision (Pro licence required) will have the ability to evade defenders and you'll work even better teamwork with your teammates by utilising defensive and attacking coverage.

Re-designed Player Trajectories have been re-designed for every you are in the pitch. With more responsive dribbling, crisper ball control, and shots are shaped better, your game play will be more explosive.
