After just a week of the drop on disc being released, FIFA 21 was the first entry in the series to receive a patch to fix a handful of gameplay glitches, alongside an Xbox One X patch to correct ghosting issues, fix the league editor, increase player heading accuracy, and improve off-ball logic. (Essentially, it readjusted the settings to better match up with how the game played when you played it.) With FIFA 22, EA Sports has taken what appeared to be a bold plunge into the future. The game has received a brand-new engine, "Epic's Frostbite" (of Frostbite 3, that is), built to create a "more connected experience across the board," according to EA. Some players have noticed that the game looks a bit different compared to other recent FIFA games. This is due to the fact that the game now features highly detailed, cinema-quality graphics at 1080p, a first for a FIFA title. The result is that the game comes with around 100 other graphical features that let players see every hair on their opponent's head, even when they're far away. The all-new Frostbite engine also allows for instant feedback and a more precise player collision physics (more on that in a bit). The "instinctive" tackling system will feel more natural, meaning that you'll be able to fake out defenders, so you can run past them rather than feign a tackle and give your opponent an opportunity to steal the ball. To distinguish players on the pitch, in-game cameras have been upgraded with a new view that puts players into thirds: a top view that gives a bird's eye view over the entire playing surface, a behind-the-back view that mimics the position where the ball would be for the target player, and a second-person view that allows for closer, close-up views of the action, similar to popular 2K sports video game series. The "Impact Engine" has also been upgraded from FIFA 19. EA notes that the engine is up to 60 times faster than FIFA 19 and that the in-game physics will feel more impactful, allowing players to forgo the unnatural positioning you would see with a last-man-standing tackle or a dive to make a play. EA claims that the all-new Impact Engine will make players feel more connected to the game, even if they're sitting remotely and watching it on a TV. Players will

## **Features Key:**

- Get street cred as the star player of your dreams with the addition of five-star ratings. These new PS4.NET capabilities allow you to instantly mould your team, alter five-star ratings and give you real-time feedback on key player matchups. You can even sync your five-star ratings to the five-star ratings of your EA SPORTS account, and see your achievements reflected at the top of EA SPORTS CUP, so you can always keep track of your performance with a single glance.
- FIFA 22 introduces HyperMotion 360 technology, which places increased importance on ball skills and overhead passing while providing physics-based controls on foot to match the movement of a player. All dribble moves and fake shots on goal are 3D actions, but you'll still have the touch and control to finish with precision shots. To develop on foot skills, a new pass completion system adds more options for both short and long passes, including whip-crosses. Devastate the defense with the new quick-hit pass, or lead the counter-attack by sending a cross into the box through a raking run. Throughout the pitch, pass options have been reworked to give players more varied options.
- FIFA Ultimate Team.

This year, the ratings of a few of the key attributes have been changed. The new rules apply to FUT 22. In addition to receiving a pass rating and a shot rating, players can also now receive ratings for tackling, passing, crossing, heading, dribbling, marking, and heading (using a variety of the passing or heading controls). The ratings are determined by the player's performance in gameplay situations. The approach to rating these attributes has been to give a pass rating based on how successful a player's passes were in a gaming scenario, and a shot rating based on how successful his shots were. The ratings for other attributes will be varied.

**Key Attributes**

**Passing :** Determines how well the player passes the ball :

**Shot Rating :** Determines how many of the player's shots hit the target :

**Tackling:** Determines how well the player tackles and
