What's New In?

Hotspot Shield is a VPN-based software that acts as a shield against network and Internet surveillance. It is equipped with a strong encryption technology (SSL) that allows it to secure web sessions, personal information and data transfers. Hotspot Shield is an ideal solution for novice and advanced users alike. Its myriad of tools, privacy policies and intuitive user interface make it not only simple, but also accessible to everyone. On the other hand, its speed and functionality can surpass advanced VPN providers, however, there might be some performance issues and its security can be greatly affected by third-party servers that are not subject to the Hotspot Shield VPN Network Detection feature.
