PROMOTIONAL MATERIALS Company:  
except Software GmbH & . bystronic ibi-  
rican s a r 98 3/40 mw/nm laser - IP:  
Publication: BySoft 7 Manual. The present  
description is a supplement for BySoft 7  
in the context of the Praktikum AMX®  
which supports the process by which  
products from the "Baby BySoft"  
team at RWTH Aachen University are  
created and integrated into the AMX®  
system. On the one hand, the publication  
describes the basic features of the edition  
to be used for creating objects in an  
AMX®-compatible format. On the other  
hand, the publication also covers all  
technical aspects of AMX®. This  
includes functions in all areas of the  
AMX® software. Therefore, the  
supplementary document is intended to  
give all AMX® users a summary of the  
functions available in the edition for  
creating and managing objects in  
AMX®-compliant object formats. This is

---

an application-neutral document that can be used in any AMXÂ® project using BySoft 7. The contents of the printed manual are linked to the online manual, which is accessible from within AMXÂ®.

Autism Puts Multiple Voices in the  
Conversation Texas Cures Autism Puts  
Multiple Voices in the Conversation When  
Lynn and Jim Foster sought to have a  
child, they agreed to a three-phase  
process of infertility treatments that led  
to the birth of a daughter. At the end of  
the process, they enrolled their baby in  
the intensive in-home intervention  
program, Texas Cures Autism, where she  
started to show signs of what the state  
calls “typical autism.” Now almost 3, the  
girl, who the Fosters adopted, had her  
first “Texas Time,” a 10-day stay at a  
large summer camp in Huntsville over  
Labor Day weekend. “We knew that she  
was different since she was a baby,” said  
Lynn, 45, a former company director at a

---

Texas telecommunications company. “But we didn’t really understand the autism until we went through the treatments.” On Wednesday, Lynn testified before the Texas Senate Committee on Economic Development in support of a bill that would provide the \$45 million needed for a state-funded program that serves up to 1,100 children with autism each year and would save taxpayers an estimated \$260 million to \$270 million annually when it comes time to pay for the program in the coming decade. The bill, SB 2, was approved by the Senate Committee on Economic Development on Sept. 19, but has not been scheduled for a vote in the Senate or the House. SB 2, introduced last month by Texas Democratic State Sen. Wendy Davis, would expand the number of preschool slots at early childhood development centers to the maximum allowed by Texas law. A companion bill, also introduced last

---

month by Davis, is before the House Education Committee. The plan to expand preschool slots at a cost of \$1.4 million a year was first proposed in May 2012 as a part of the state's autism spectrum disorder prevention plan that began the rollout of the Texas Cures Autism program. The eight

Craniofacial microsomia is a congenital anomaly characterized by the absence of the mandible and maxillary structures (zygoma, palate, face, and the muscles of the facial expression). During the past

---

decade the embryology of this anomaly has been extensively studied and several pathogenetic mechanisms have been postulated. These involve defects in the migration or differentiation of mesodermal tissues in the region of the branchial arches, and prenatal defects of the structures that join the mandible to the hyoid apparatus and the skull base.

Analysis of recent literature and our experience show that this disease is multifactorial and is probably the result of the interaction of both genetic factors and environmental factors.Q:

Programmatically importing a Zend Framework module Zend Framework 2 is new for me and I'm trying to figure out if it makes sense to use it in my project. I'm generally a PHP programmer but I'd like to use Zend to handle requests to my scripts. What are the benefits of using Zend Framework for the web when I can just use PHP for the web? And if I decide

---

to use it, how would I go about importing a module into my script? A: The benefits of using Zend Framework for a web application are: Development time - The framework is much faster to develop in than a standard OOP PHP MVC.  
Productivity - My
