You may wonder why Adobe is so concerned that you use Photoshop to manipulate pictures of children, pets, and family snapshots, as opposed to the typical pursuits of adults, like, say, crop, matte, and strip dark areas. That's a good question, but there is no rule against using Photoshop for other purposes. Go ahead and make baby pictures if you want. You'll learn more about Photoshop's individual tools in Chapter 10. So which version should you get? Figure 3-1 shows you a comparison of Photoshop CS3 and Photoshop CS4. Illustrations by Janice Masters **Figure 3-1:** Photoshop CS3 and CS4. Photoshop basics Let's start with Photoshop basics — a crash course on how to work with the program's images. (It doesn't take long.) Working with the Basic Tools You have many ways to use the tools, and the tools themselves may have a different appearance in the Tools panel, but the basic idea remains the same: You choose the tool, click the button, and then direct your mouse cursor to select the tool's action on the picture. You use the tools in this order: The Clone Stamp tool: After using the Clone Stamp tool to merge multiple image layers, create a new layer, and then mask the layers you want to keep. (The next tool you use is the Magic Wand, which enables you to select everything on the layer.) The Lasso tool: Start with an outside selection boundary, or Lasso mode, and then click the thumbnail and drag to draw a selection. Then use the Selection Brush to paint the area you want and subsequently select it. The Pen tool: A single line can be used to highlight or delete. (A menu of 16 other tools is available.) The Move tool: Draw a line, point, or polygon to copy and move or rotate a picture, clip art, or layer. The Magic Wand: Click the thumbnail to select anything the size of the brush. Click the center dot to deselect the area. (If you want to deselect only the area inside the click, hold down the mouse button when you click the center dot.) Click the down arrow to adjust the size of the brush. The Selection tool: Click the thumbnail to select a specific area. Click the center dot to deselect. The tool has a wide variety of options. The Healing Brush tool:

What is Photoshop? Photoshop is a software application with a wide array of features. It is a powerful and robust tool for creating and editing images. It has powerful image editing tools, such as adjustment layers, masks, filters and adjustment brushes, as well as 2D and 3D image editing tools, photo editor features, text tools, vector drawing tools, image resizing tools, and so much more. Adobe Photoshop is a photo manipulation tool that allows you to quickly edit and modify images. Unlike other graphics programs such as Adobe Illustrator, it is more than just a tool, but a collection of tools for designing, editing and retouching images, images, and videos. Software programs that offer similar features include i.e., Microsoft Office, Corel Photo Paints, Microsoft Publisher, Paint.net, CorelDraw, and Paint.NET. Another option is a version of Photoshop by Adobe themselves, which is called Photoshop Elements. How to use Photoshop The Photoshop software program is quite easy to use as long as you have previous experience of using a graphics editor. If you've never used a

graphics editor before, you might find the interface a little confusing. To create a basic image you will most likely be using the Rectangle Tool and the Rounded Rectangle Tool. A few more advanced features can be accessed by clicking on the tools in the toolbar. Photoshop has a simple graphical user interface, with icons instead of menus and drop-down lists. This means that the menus or the list of commands in the program's menus are replaced by icons that look like shortcuts. Besides editing your images, you will also use another feature of Photoshop called layers. Layers is a feature that allows you to add features to an image. Elements allows you to add up to 8 layers to an image.

How to add a layer in Photoshop A layer is a feature that is used in the program's layers panel, where you can add features to images. To add a new layer to an image, simply click on "New Layer", and then click on "New Layer from Clipboard". You can use these layers to select parts of an image, or to apply effects to them. You can also use layers to hide parts of the image, so that you do not have to edit them while editing the other parts of the image. You can add a 388ed7b0c7

Organise your cleaning by having a neighbourhood cleaning day and work up a team to clean up neighbourhoods and streets around your house. Encourage local council or community groups to join in with the Cleaning Day. Organise your neighbour cleaning party Bring the area in your house into "great shape". Turn over and then decide what is important for you to have a house and yard that is clean and tidy. Remove rubbish wherever possible. Get children and family members to help out with the collection. Organise your Neighbourhood Cleaning Day The success of any Neighbourhood Cleaning Day will depend on how well you plan it. Read the tips below and decide on how to run it. Invite neighbours and other groups Get neighbours to invite people and get them involved in the day. It is all too easy to forget to invite people! Clean up your street and get kids involved If you have kids, ask them to help you on this day. Involve your local council or community group Get your local council or community group involved in your clean up event. They may be able to help you. Think of challenges or important events in your neighbourhood during the year Think of events or other things that need to be done in the community that will make it easier to start or keep a neighbourhood clean. Try to do what you can, but be realistic. Consider doing something different. Have an area cleaning party You can start with an area of your house and turn it into a party. All you will need to do is to provide food for people and organise team leaders. Have the team leaders organise and oversee their team members as they clean. Make it a play day. Have a picnic or other activity and let people go along to the activity. They will enjoy cleaning and also be active. Challenge teams to clean Have teams of two or more people. Decide what to clean and put a prize for each team. Take photos of the result. This will make it memorable for people and the pictures can be put up on the Internet. Donate any items you do not use Donate items you no longer need or have space for. Other people will be pleased that you have given away what you no longer need. Make a list of volunteers Keep a list of people who will help you. If you

Popular Tokyo-based fast-food chain Yureka has announced plans for a new branch location in Kyoto's Shinsaibashi neighborhood of Sakyo Ward, to open in 2019. Yureka first opened its doors in 1986, and serves a selection of predominantly international fast-food fare, including hamburgers, sandwiches, Asian items and dessert. According to the company's website, there are currently 49 locations in Japan and around six more overseas locations. The Yureka Kyoto head office is located in the Otowa Ward of Musashino City. — Canned News —High-power Mach-Zehnder-based terahertz tunable free-electron laser. The first optical-electrical free-electron laser (FEL) based on a semiconductor Mach-Zehnder-device structure is demonstrated. The 2.5-mm length discharge operated at room temperature in the millimeter-wave range with the emission peak centered at 53.3 THz. A single-pass conversion efficiency of up to 2.4% was achieved at a conversion efficiency of 21%, comparable to results reported in the literature. The output power of the FEL was measured to be 2.13 mW. Single-cycle and pulse-duration of 97.2 fs and 1.6 ps were demonstrated with a repetition rate of 15.5 kHz. A FEL can be used as a light source for producing microjoule femtosecond pulses directly in the THz spectrum.Q: How do I get Collection of all the zipped files in a directory with different file extensions and then unzip them using java I have a directory which contains zip files and some other files: e.g myFolder/test.zip test.log test.pdf test.doc I want to get all the zipped files in the folder and unzip them separately and store them in separate files.I am using java and I want to get a collection of all the zipped files in the folder.And then I want to unzip each file in the collection and store them in different files. e.g. myFolder/test1.zip test1.log test1.pdf test1.doc myFolder/test2.zip test2.log test2.pdf test2.doc
