After three years of experience in the games industry we decided to form our own studio and to try our hand at our first game. We were drawn to the fantastical setting of the game and the quest is to restore the tomes of language to the world. It is no mean feat but it is a challenge that we are excited to take on. **What's new in FIA ETRC - Indianapolis Motor Speedway:**

**Warhammer Quest: Silver Tower** is a browser-based MMORPG (massively multiplayer online role-playing game) published by none other than Games for Windows LIVE. Set in the fictional universe of Warhammer 40,000, Silver Tower (known as Occult Lore: Silver Tower in Japan) introduces players to a heroic band of characters whose purpose is to protect the Keepers of the Tower. However, Silver Tower is not the only 40K game Games for Windows LIVE has published. Warhammer Quest: Silver Tower was followed by the 2010 sequel Warhammer Quest: Cold Vengeance, which featured new cultures, new races, and a new campaign featuring an entirely new system for expanding your hero. Combat The goal in Warhammer Quest is to seek out and destroy enemy generators, areas that create warp storm pockets. Warp storms in games like Warhammer Quest are a boisterous force that roam the battlefield unchecked, displacing legions of foes in waves. When a player destroys a generator or area, they earn souls that can be used to buy additional power-ups or upgrade weapon/armor skill trees. When players open with a maximum of three or four souls, they will be rewarded with a defeated foe. Warhammer Quest differs from most RPGs in that it does not have a wizard school system. Instead, each Hero can learn certain skill trees that become skill colors, an effective means of categorizing the availabilities of all available Hero powers. However, each Hero has the ability to take certain powers from different skill trees, by paying Soul crystals. The game features a turn based combat engine that incorporates the formulas found in previous Games for Windows LIVE titles such as Dungeons & Dragons Online: Redemption, and Warhammer Quest: Silver Tower. Certain action sequences use an in-camera interactive camera mode called "Hero's Eye". It allows the player to pause actions and scroll through menus, enabling players to save during high action scenes and to return to action at a later time. In preparation for Cold Vengeance, several changes were made to the interface, in line with the new accessibility standards introduced in Windows 7. PVP & PVE Warhammer Quest: Silver Tower is instead a story-driven RPG experience. Players instead engage in PvP (player vs. player) and PVE (player vs. environment) combinations. PVP: Each class has a set of Hero powers that can be called upon when engaging in a PvP battle. Similar to Champions Online, only one hero is active at any given
