There are limited picture controls. You can rotate, flip, and crop your image, you can sharpen or soften it, add a vignette, or blur. You can edit the white and black points, sharpen or blur the image using a Filter or Adjustments Brush, and add a background. You can sharpen or soften the white and black points, add vignette, or apply a vignette. You cannot apply a gradation, gradient, or a mask; you can edit the white and black points and sharpen or blur the white and black points only.
