A character creator that has more of a Germanic influences. The legendary and great Queen Maeve, ruler of the Mediterranean, India and North America in the Roman Empire. It is said she is the reason of this new invasion we can call it a nightmare. Her mission was to conquer the lands of the Greeks. Her mission was the defeat of the Eastern Roman Empire. Her mission was to transform Britannia into an independent Celtic nation. Her mission was to stamp out the existence of the Legion, her religion... We all know how the Roman Empire grew and how it became the largest empire in the world in the first place. The same old story. Her mission was to create the army, the government, the way of life and the military system of the Celtic people. She had many names and she would roam the world in her standard warship, the Maelstrom. Her true name we are forbidden to say it. The names we know her by have been taken from the legends,

Pre-resume Agent: Jayant Dheyalingam Phone: 345-353-8668 Notes: Margin trader with a long history of working for larger brokerages and people advising major hedge funds. After doing a PhD in Finance at NYU on research projects at NASDAQ and DLJ, he decided to focus on trading instead. He also excelled in Chess and was for a while the world junior Champion at the age of 22. He spent about 9 months at NASDAQ as an intern so worked closely with Allan Poulsen. He was a small part of the market analytics team where he worked with Larry Benat who later became head of Quantitative Research at Jeffries in NY. Jayant was initially recruited by Marek Randel, but ultimately chose his place of residence in NYC. Though he stayed in NY longer than he initially wanted and decided to do a PhD in finance at NYU due to 'great opportunities'. He started the 'unlimited' posting with Noble Martins whilst also working at Jeffries. Jayant asked us to defer his submittals due to personal commitments. We hope to hear from him soon. Resume Summary: 6 month global quant posting when there were 2 Global Quants at Noble Martins. Risky position which meant that only exposure to arbitrage was taken on by the desk. Initially focused on writing a quantitative equity research short position, but whilst developing the thesis, the rest of the desk (including the 'worldwide' desks) came up with a different approach which was ultimately taken away from the desk and rolled into a Cross Transaction Fund. Ben Feldman Pre-resume Agent: Chris Lee Phone: 646-316-1664 Notes: Covered some shorts as part of BBY cross trade, but the positions were split before hand. Decided to hand off some current opportunities Called himself the worst quant ever Resume Summary: De-risked fund because positions were split before hand and 'mitigation' was taken. Was the only global quant in securities with the group and had an 1.5 month lead time to cross trade and develop strategies. Covered all (renewed) options, also covered the shorts written by Derig the previous year (when Derig was new to IO). After a lengthy process and several thousand

The player is Gustavo Bueno, a student at college who is trying to escape his depressing life and focusing on university. Except it turns out that he is not in a college. His school is not that organized and there is only one thing he can do to make his day better: to find the legendary and cursed book of Theodomy. This book holds the answer to everything in life, including whether he will remain a loser forever or change his fate. The game will turn into a journey full of silly jokes, crazy enemies, and various situations that could only happen in a school. The only way to make it out of this hell is to find the book, have sex with a cute girl named Suvaita, and get into her class. The only way to make it out of this hell is to find the book, have sex with a cute girl named Suvaita, and get into her class. Every thought, idea and situation that crosses Gustavo's mind is the result of his guilt and his poor life, but that will also make him live the most enjoyable and surreal day of his life. "What would happen if you could see inside your own brain and unlock the secrets of how your mind works?" That is the question that the Scopetronauts was born, to answer that question. For 2 years, 3 developers (Chad W, Jérémie-Blais and Guillaume F-F) have worked to develop this game, that serves as an electro-magnetic-visual-arts-rhythmic-collaboration with other game-developers. "The brain is a very complex thing. Despite that, the human brain controls everything we do. Each day, the human brain will be able to unlock new secrets about itself. There is no limit to what it can achieve." The player, as the main hero, will take direct control of his life while he gains access to the full (and complex) power of his mind. System Requirements:- * Supported browsers: IE7+, Firefox, Safari and Chrome * Minimum System requirements: * Windows OS (XP, Vista and 7), Mac OS X (10.6), Linux The game has been made with the Unity 5 engine on a Unity 5.6.4.
