Wolcen: Lords of Mayhem is an action role-playing game with a vast open world to explore, relentless challenges to overcome, and hundreds of weapons to choose from. Immerse yourself in

---

a fantasy world in which two distinct societies coexist: the Elden, immortal warriors who are descended from the Wild Hunt, and the Vrykerion, the Fallen, descendants of the nexuses. During the Vanishing of the Fae, an ancient war that was waged between the two races, the Vrykerion became corrupt. They lost their immortality and were forced to live mortal lives. Over the millenia, they have established vast societies in our world, leaving their mark in the forms of deities and endless power to ravage. The world of Wolcen is divided into over fifty provinces, each with its own history and geography. The Vrykerion monsters live in the

---

darkest parts of the world. Aquatic creatures dominate the seas and rivers. Giants can be found in the lands north of the mountains, and the creatures of the Fey realm call the forested areas of the continent home. The Elden live in the northern parts of the world and, alongside their reclusive nature, are very clever and agile. There is a rivalry between the two races, but the Vrykerion despise the Elden more than any other race, seeing them as perfect enemies. Between the two are the shifters, beings that are half-breed, born out of strange unions between Vrykerion and Elden, and play an important role in the conflict between the two races. The

---

second playable race is the Fae. The Fae lived in harmony with nature, until the fall of the Vrykerion corrupted all of the races, awakening the forbidden gifts of the Fae race. Fae men, women and children, plus their allies, are no longer slaves to the Vrykerion magic, but gain their own superiority and weapons to use against their enemies. This is a fantasy world that is heavily inspired by world history and myths. The map of the continent, with all fifty provinces, is shown here: During the Vanishing of the Fae, both the Elden and Fae races were able to learn to utilize magic from the Wild Hunt. The Elden learn to channel the power of the

This is a casual game with a very different story. Our goal is to produce fun games - short and lovely. So, if you want to play challenging and you can wait for the overworld and for the story to be completed in a long time, you should not play this game. We are really glad that you like our games and we like to hear your feedback and comments. Fahrenheit is a survival horror that takes place in a retro 80's city. The game will start in a 2 minute prologue and will take you to a different time where your first steps will be in the middle of an air traffic emergency,

---

after that you will try to survive in a totally random city. Welcome to the 80s, where FM radio ruled the airwaves. Plug your ears to static, get ready for awkward conversations, and watch out for those flying hands that are "harvesting" people's brains.

Creator Danilo gives us the opportunity to bring you his most beautiful project. A buddy, who loves the radio waves, and the 80s period, brought you a unique concept. A very personal project that is a little bit different from what we are used to. Fahrenheit is a game which in its concept resembles this amazing 80s FM radio, and in its graphics, looks like a movie from this era. Note: This

---

game is in early access, and you will receive inside the game special items related to the '80s period, which you can use in game to obtain money, buy new ingredients or buy new items for your combo. Also, to understand better how to play, you will receive all the instructions (and the buttons, haha) inside the game, you can have some of them in yours 'home'. There will be more levels coming soon, and a lot of changes in the menu and in the game, so watch out! FEATURES - A classical FM-Radio type, which you can tune in different cities with different channels and codes. - Seventies-style graphics. - A fictional story that you will be able

---

to understand only if you continue playing. - Four special worlds made of different biomes. (could be more in the future) - Different special objects that you can collect and use in game to get money, purchase new items, or to buy special objects that you can use to get even more money or other things. - Repair your weapons, your c9d1549cdd

---

mass exodus of migrants fleeing violence in other parts of Mexico. An ambush on Thursday struck the bus station in the city of Chilapa, where hundreds of migrants from the nearby state of Chiapas traveled each day to cross into the United States. The highway leading to the border has been closed by Mexican authorities to discourage those migrants trying to cross into the U.S. At least two others were killed in Chilapa and the nearby state of Oaxaca, despite the crackdown on the border by the government of President Enrique Peña Nieto, who claims “zero tolerance” for those migrants entering Mexico illegally. The bus station was the target of a

---

shootout between criminals and the Mexican military, but those fleeing the violence and seeking to enter the U.S. were also targeted. The bus station is 100 yards from the Rio Grande river, which U.S. officials say is a major pathway for Mexican migrants to the U.S.

“(Thursday’s shooting) was very strange,” said an immigration lawyer here who was prevented by police from talking to journalists, but who said that the shooting on Friday was in a different area, near the bus station. “I heard that two buses were stolen. I’ve been waiting for a bus to cross the border for two months. Now I’m going to wait even longer.” Since May, thousands of people have

---

traveled on foot or by horseback in the area of the border between Chiapas and Oaxaca, where the hot, humid sun makes the long trek through territory controlled by drug gangs and leftist insurgents a grim and sometimes fatal proposition. On Friday, another bus carrying 200 migrants stopped on the highway before it reached the town of Ocuilan. Reports of an attempted assassination in Oaxaca were reported by Mexican media, but were not confirmed by government officials. Four people were killed in Mexico on Saturday, including the daughter of an executive of a company that transports livestock. A man set himself ablaze as protesters

---

marched through the city of Guerrero to denounce the poverty and other social conditions in the country. Two other men were killed by a police officer in Salina Cruz, another city in
