In this debut, Chronos has been a pioneer of VR gaming with a theme that everyone remembers from real life: opera. Chronos developed a multi-level, character-driven story in a setting that's familiar to anyone from Munich: The Bayerische Staatsoper. The story line is based on the music drama "Die Walküre" by Richard Wagner. V-Aria: You'll be the master of your own destiny and can choose between two characters: the romantic and good-hearted but naive young artist Gottfried and the charismatic but arrogant little joker Heinrich. You can't wait to see the world of opera and make new discoveries! V-Aria: V-Aria is "one of the first VR games" that doesn't require VR peripherals for a smooth VR experience. If you already own a VR head-mounted display (HMD) or smartphone, simply pair it with V-Aria, download the app and you're ready to go! Key Features

Headset Compatible: V-Aria is compatible with all known VR headsets and smartphones and does not require additional accessories such as wireless VR control devices, phone base stations or a VR base station. Pair V-Aria to any smartphone with Google Cardboard or Samsung Gear VR. Audience Participation: At the request of the Bayerische Staatsoper, the V-Aria story is based on scenes from Wagner's "Die Walküre". It's a thrilling roller coaster ride through the opera house which you wouldn't want to miss, but as the master of your own destiny, you will decide if you want to accept the invitation from the Court Opera House and make your entrance into the magical world of opera. Room to Roam: V-Aria offers plenty of space for exploration and 3D roaming. The opera house will open up in all directions and you will have to search and find new paths, treasure boxes and twists in the game. Find Hidden Objects: You won't be stuck in Opera House forever! The app includes a list of hidden objects which are integrated into the opera house for a little challenge. The closer you get to finding the objects, the more you can unlock new areas and features within the opera house. Audience Interactive: While the opera house is being built, you will encounter a host of characters and musicians who appear during the

Skyborn is the first studio album by American rapper Ace Hood, released October 22, 2001, by Ruff Ryders Entertainment/EMI Records. The album features guest appearances from several prominent artists, including the G-Unit trio members Lloyd Banks and Tony Yayo. It has been certified gold by the Recording Industry Association of America and received mixed reviews from music critics. Background In 1997, Rampart Records artists Baby Bash, The Lox and Mannie Fresh released their recently signed to the company group Ruff Ryders, which started in April 1997. It included a number of artists, including R&B singer TQ and rapper Ill Bill. Mannie Fresh said that although Bash and Yayo were talented, the trio needed a third person to complement them, and later added that they asked him to tour with the boys. Fresh then said: You're not gonna see a better lyricalist than Tony Yayo. He had one thing he was trying to prove to everybody, and what I'd done for him, there was nothing better I could do for him than come with him, just like a bodyguard would walk with you. And I proved to him that I could still rhyme. As the group had no name, they came up with their first mark Skyborn, a spirit that comes from the Latin word sol for sun. Fresh wanted Skyborn to symbolize the four faces of his fans. In August 1998, Fresh released his first solo album, Fresh Is the New Black, which showcased a more raunchy sound, compared to the Ruff Ryders sounds. In 1999, The Lox, who recorded as a duo with Daz Dillinger since 1990, had their debut on Ruff Ryders-affiliated rap label Salt. After its successful promotion and radio airplay, The Lox was asked to go on and headline national concert tour. It would be both the label's and the group's first tour, which proved successful. In April 2000, Boot Camp Clik would be signed to Ruff Ryders. Singles Bloody Murder was released as the album's first single. It features production by Mannie Fresh, and was the first and most successful single off the album. The song became popular with fans in 2001, and still remains as popular today. The song's remix was later released, and became a hit on other charts. "Make the Video", a featured on the album, was released
