In Theaters Fall 2019 | Set in a futuristic timeline, Battlefront: Greed, a strange planet that juts from the surface of the core planet Coruscant, is renowned for its Hellfire Club and infamous Thesmirarchy, which are omnipotent cults that have long ruled the planet. Heroin is the dominant drug of use on the planet. Star Wars Battlefront Greedol Created by Kelly Luce, Jesse Magee, and Denis Loubet, the game's plot centers around a bounty hunter named Han Solo, who is hired to overthrow the Thesmirarchy, who claim to be gods. The game takes place in a third-person combat-focused shooting game mode called Star Wars Heroes, which is set in a world of self-contained factions, in which the player takes on specific quests offered by special citizens. Star Wars Heroes sees the player taking on specific roles and quests, with each one having its own set of equipment to use. The player can then select between three characters, each with their own playstyle. The game uses its own mix of camera control, which moves during player movement but is locked in when not moving. The player is able to see movement from the camera with a distance indicator, as well as being able to lock down a camera to follow the player. Star Wars Battlefront Greedol The game uses a system of game currency, which allow the player to buy equipment upgrades or purchase items, as well as unlock content. Items are either purchased in-game or unlocked as rewards for completing gameplay or participating in special events. The player can earn XP to unlock weapons. The game features five playable Heroes and nine playable "Hero Variants", each of which comes with its own secondary skills to use. Star Wars Battlefront also supports a co-operative mode in a single-player "Hero Assault" mode, where up to four players can take on a wave-based campaign. Star Wars Battlefront Greedol At the game's release, it was officially claimed to have over 500 hours of gameplay, though the developer has also hinted
