Autodesk introduced the AutoCAD Graphics System and Graphics API in 1989 for Windows. Graphics were first introduced to AutoCAD in 1991. The graphics feature set has been substantially updated and expanded with each major AutoCAD release. Autodesk changed the name of AutoCAD from MicroStation (1994) to AutoCAD (1995), and to AutoCAD LT in 2001. AutoCAD is mainly intended for 2D drawing but it has limited 3D features. In the later releases, AutoCAD has extended its capabilities with the AutoCAD Graphics Manager, which includes a dialog-driven graphics system for creating drawings and 3D scenes. The Graphics API allows users to use the API for all applications on the desktop. An Autodesk demo disc of AutoCAD is included with most new computers and is sold separately for older ones. Q: SQLite - IN operator not working when checking for multiple values I am running into an issue with my SQLite query. Basically I have two tables, Customer and Address, where an Address entry has multiple Customer entries. I have tried to use the IN operator to check if a customer has any of a list of addresses like so: SELECT * FROM Customer WHERE CustomerID IN ('1','3','5') Obviously, this does not work. A: You can use LIKE with proper wildcards: SELECT * FROM Customer WHERE CustomerID LIKE '%1%' and so on Q: Overriding a method that has the same name as a Java keyword I have the following static method in a class: public static String returnAnotherString() { return "string"; } And I would like to override the method and return a different string. public static String returnAnotherString() { return
