Microsoft Toolkit 3.8.6 Final (Windows-Office Activator)

My question is: Why this mismatch? How to fix this issue? Is it due to some bug in Activator 3.8.6 or MS Office 2016? A: Following the comments, I downloaded the Office 2016 Activator and ran the command again: msiexec /package {D3254A9E-9A73-4D8B-AEFC-A5F00A14DEF9} /quiet /qn.\Office2016.msi /l*v C:\Users\Ehsan\Desktop\Activator\Office2016\MSIX\log.txt And now it's working fine. Q: Find amount of work from n inputs to n outputs Im trying to solve the following problem: I have n inputs and n outputs for a piece of equipment. How many different ways could I operate the equipment? I think a good way is to create combinations of the possible input, and then count the amount of ways that the combinations result in the same output. EDIT: I found this way to get the total amount of operations: $n!/(n-k)!*n^k$ and it works for the first example, but I also have to count the reverse operations. So if I have input: 1,2,3 and output: 1,1,2 I would have to count the input: 2,3,1 and output 1,1,1. A: Your sum is correct, but you've made a mistake: you only need to count sequences of length k with respect to the output you're looking for. So, if you have n outputs, you want to sum over all sequences of length k with respect to them. In your language: n inputs $X\_1, X\_2, \ldots, X\_n$ and k outputs $Y\_1, Y\_2, \ldots, Y\_k$. This has $C(n,k)$ possible sequences, so that's your answer. Human ethmoid The human ethmoid is a large cavity of the cranium, containing the orbit (eye socket), the nasal cavity, part of the skull base and the anterior part of the middle cranial fossa. It contains the cribriform 6d1f23a050
