Cram Quantize has some of the best music mastering tools on the planet. From the integrated expression engine to the massive quantization capability, you can never go wrong with this plug-in. Expression>Quantize is the original Cram Quantize. It has been the industry standard for 30 years and is now supported by a powerful new Neural network Quantization engine. Expression>Quantize brings the power of professional studios to the home studio. Ableton Live 9 looks more intuitive than ever. The new modeling features make it super easy to create your own sound effects. Create new sounds quickly and easily with the new Harmonic Equalizer and Generator, plus the Voice Tool and new Sound Canvas. Simply select one or more sources, and Studio One automatically creates a virtual microphone out of your choice of microphone. With two audio inputs and a monitor output, you can monitor your audio while you create a great mix. As we grew, we realized a gap in the market: a software version of the professional audio console, the SoundGrid HP5. This console lets you hook up multiple software audio and audio/visual devices in parallel, and with the HP5, you can do multi-channel recording and mixing to multitrack digital audio or using TDM/IP to connect live audio from a stage, in the studio, to the stage or all in the stage. Its ideally suited for engineers, composers, and sound designers who work with hardware and software at the same time. The SoundGrid HP5 is the professional audio console from pioneering audio mixer/producer Garry J. Chappell. Soon after the SoundGrid HP5 was released, the HP5 API was developed to allow software developers and manufacturers to tap into the power of the HP5. Similar to the API that the HP5 offers, the SoundGrid API provides multiple access point and C language interface for software developers to access the HP5. 5ec8ef588b
