Ask us your questions We would appreciate to answer your questions regarding: Q: How do you make a basic sliding menu using Ajax and DHTML? I want to make a basic sliding menu that slides in and out using Ajax and DHTML. I have seen a ton of websites that implement this functionality but I can't figure out what html and php/asp code is being used to do it. For instance, I want to slide a user left when they click on the menu item and slide it right when they click away from the menu. Here's a very simple example of what I have tried to accomplish: Menu 1 Menu 2 Menu 3 content1 content2 content3 I'm trying to make the #content1, #content2 and #content3 divs fade in and out smoothly when you move your mouse over/off the #menu div. A: <http://woothemes.com/scripts/jquery-menu-slider/> <http://www.koolkart.com/scripts/jquery-menu-slider/> <http://www.geeknme.com/how-to-create-a-simple-sliding-menu-with-jquery/> <http://designmodo.com>.
