Cracking Adobe Photoshop is a bit more involved, but it can be done. First, you'll need to download a program called a keygen. This is a program that will generate a valid serial number for you, so that you can activate the full version of the software without having to pay for it. After the keygen is downloaded, run it and generate a valid serial number. Then, launch Adobe Photoshop and enter the serial number. You should now have a fully functional version of the software. Just remember, cracking software is illegal and punishable by law, so use it at your own risk.

There is a minor bit of irony in my posting this review right after finishing another review, since Adobe has clearly stated that the Smart Preview feature is being held back for release with Lightroom 5.0, but here I am calling attention to it. As I said before, I would have expected Adobe to improve Lightroom's usage of available resources to make it operate faster, especially when it comes to Importing/Exporting images. That said, I am still generally happy with how snappy Lightroom is. It's just no better than Lightroom 4 in my opinion. Adobe has included a new feature in Lightroom 5: Cloud Documents. I have myself some doubts about the ability of the system of establishing trust when it comes to sharing files. I am not a fiend for BitTorrent and anything to do with it. In fact, I'm a little suspicious of the whole concept of sharing files over the Internet, mainly because I don't think images were ever this easy to share before the Web existed. Even then, I think it made it too easy for unscrupulous people like pirates and hackers to pick up on drafts and images you have not yet finished. On the other hand, I do have to mention that images can be shared in a secure way using this new feature. And if this feature is absolutely necessary for sharing electronically, I think it's quite good that it's incorporated in one of the most powerful photo editing programs, no matter how you may feel about certain aspects of this program. I'm saving my concerns about the security for another day.
