## What's New in the?

DuoExplorer is a software tool whose purpose is to help people in viewing and managing their files and folders in a more efficient manner, with two separate panes. The upper hand of a portable app This utility does not require you to go through an installation process, as it is portable. This means that, unlike installers, it is not going to add new items to the HDD and Windows registry without

your approval, and it is not going to leave any kind of traces behind after its removal. Most importantly, if you move the program files to an external data device, you can take DuoExplorer anywhere with you and run it on the fly, on any PC you come in contact with. Easy-to-use environment The interface is well-structured and simple, as it only comprises a menu bar, a few buttons and a several panes to display two folder structures and the contents of selected directories. Both power and novice users can find their way around it, without experiencing any kind of issues. Change the display mode This software tool lets you manage the contents of your hard drive in a more efficient manner, by displaying side-by-side panels. The context menu presented here is the same as in the Windows File Explorer, and you can change the view for each pane, from thumbnails to list or details. Add bookmarks and view last added items It is possible to view hidden files, create new directories, and bring up properties pertaining to each item, with just a click of the button. Last added folders and files can be displayed in a new window, while you can also add and manage bookmarks. Conclusion To wrap it up, DuoExplorer is a pretty handy piece of software, when it comes to managing items from your hard drive. The interface is intuitive, the response time is good, the CPU and memory usage is low and our tests did not reveal any kind of issues, such as crashes or bugs. Nonetheless, you should know that it lacks some options that other similar products present.
