The app helps you repair or re-enable Windows tools such as Regedit, Cmd Console, Run, Folder Options, System Restore, Control Panel, Task Scheduler, Task Manager, Context Menu, My Computer, Search and MS-Config, most of them automatically disabled by viruses to block you from removing the infected files. In addition, Re-Enable comes with a dedicated safe mode restore for Windows XP, Vista and 7, but also with separate tools to edit hosts, reset files and folders attributes, scan and delete Autorun.inf, repair the desktop, un-hide the drives and repair Explorer.exe startup problems. Windows 7 users must keep in mind that they have to run the app as administrator in order to be able to apply the changes.
